

Sleepy Spelman Students

Sleep, Academic Load, & Stress Among Surveyed Students
Exploratory analysis of survey responses from 18 Spelman students

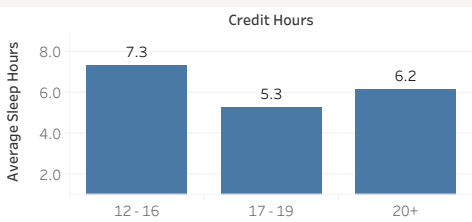

Sleep Distribution by Hour

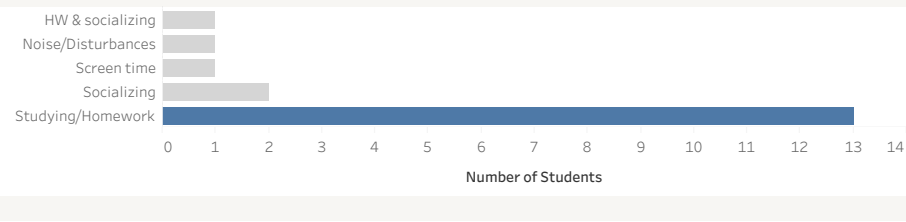

Sleep vs. Stress

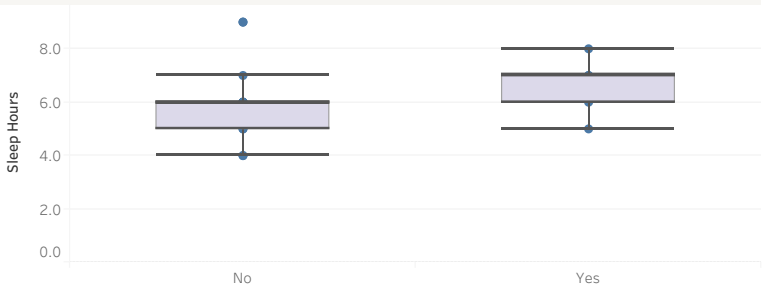

Average Sleep by Course Load

Primary Reasons for Sleep Loss

Sleep Hours by Bedtime Routine

Key Takeaways

- Average was 6.22 hours of sleep per night.
- Sleep and stress had a moderate negative association ($r = -0.39$), students reporting more sleep tended to report lower stress.
- Average sleep varied by course-load, the 12-16 credit group reported the highest average.
